

STEEL PREP 3 IN 1 PRETREATMENT CHEMICAL

PRODUCT DESCRIPTION

Steel prep 3 in 1 solution is a single stage pre-treatment solution for metals such as Iron, Steel, and Aluminium etc. Treatment with Steel Prep 3 in 1 renders the metal free of grease, oil, rust and deposits a chemically converted protective coating which provides a better key to the paint. This treatment also provides a better under-film corrosion resistance and gives a durable paint life.

Chemical treatment with Steel prep 3 in 1 is superior to sanding and mineral spirit wiping.

A general purpose treatment applicable to moderately rusted and moderately greased metal surface.

AREAS OF APPLICATION

Steel furniture, light fittings, slotted angle, machine boodies, chemicals and electrical equipment's, automobile and cycle parts etc.

DIRECTIONS FOR USE

Steel prep 3 in 1 is to be diluted with water in the proportions of 1:1 or 1:2 depending upon the extent of rust and grease present. It should then be applied by swabbing or brushing then wash the surface thoroughly before applying the paint.

NOTE

The Solution may cause irritation if it falls on bare hands or skin. Such areas should be immediately washed with plenty of water.
